### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The Applicant claims a fuel cartridge for a fuel cell comprising a first chamber for retaining a high concentration liquid fuel, a second chamber for retaining a low concentration liquid fuel, a partition wall for partitioning the first and second chamber, wherein the second chamber is provided with a fuel outlet port through which the second fuel passes to the fuel cell body, and is provided with a fuel inlet port to which the first fuel is introduced from the first chamber, and the first chamber and second chamber are detachable connected at a fitting section such that the cartridge is removably mountable to the fuel cell body while the first chamber and second chamber are linked.

In the prior art of record, Fajita et al., U.S. Pat. Application Pub. 2005/0058880, teach a fuel cartridge having a fuel tank and a buffer tank wherein the buffer tank is integrated with the fuel cell. Becerra et al., U.S. Pat. 7,270,907, teach a fuel cell having two fuel bladders with different concentrations, Wherein both low and high concentration fuel are fed directly to the fuel cell.

However, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a configuration where low and high concentration fuel tanks can form a removably mountable fuel cartridge and the first chamber and second chamber are linked.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
